A/B Testing Helps You Find What Works Best

Data-driven decisions. Real business growth.

Same Goal. Different Results.

You create this ad to promote a new gym membership.

A

Original Ad (Version A)

VS**B**

Alternative Ad (Version B)

What if another version gets twice as many sign-ups?

You won't know unless you test.
That's the idea behind **A/B testing**.

A/B Testing Means:

Create two or more versions of an ad.

Show them to similar audiences.

Compare the results (e.g., sign-ups, clicks).

Use the better performing version.

Key Takeaway

A/B testing helps you find what works best based on real results, not assumptions.

Test.
Learn.
Grow.

Headlines Make the First Impression

The headline is often the first thing people notice. It should communicate value quickly.

A**Version A**

Simple and direct

B**Version B**

Focuses on benefit and offer

Headline Approaches

A headline can focus on different ideas:

**Benefit**

“Get Stronger, Feel Better”

**Problem**

“Tired of Feeling Unfit?”

**Curiosity**

“A Stronger You Is Closer Than You Think”

**Offer**

“Join Now and Get 50% Off”

**Result**

“Real People. Real Results.”

**Audience**

“Designed for Students”

**Key Takeaway****Make the value clear quickly.**

*A better
headline drives
more results.*

Ad Copy Explains the Value

The headline gets attention. The ad copy explains why the customer should care.

FITLIFE
STRONGER EVERYDAY

Get Stronger Without Spending More

Flexible monthly memberships, beginner-friendly workouts, and trainer support.

- Modern Facilities
- Trainer Support
- All Fitness Levels

1 **Headline**

Gets attention.

Get Stronger Without Spending More

2 **Ad Copy**

Explains why the customer should care.

Flexible monthly memberships, beginner-friendly workouts, and trainer support.

3 **CTA (Call to Action)**

Tells the customer what to do next.

Start Your Trial

What → Why → What next

A good ad clearly communicates:

What

What is being offered?
(e.g., gym membership)

Why

Why should the customer care?
(e.g., affordable, beginner-friendly, trainer support)

What next

What should they do now?
(e.g., start a trial)

Key Takeaway

Good ad copy connects the offer to the customer's needs and drives action.

*Clear message.
Higher results.*

CTA — Call to Action

CTA tells the customer what to do next.

Try It Today

Match the CTA to Your Goal

Don't choose a CTA just because it sounds attractive.
Think: **What action do I actually want the customer to take?**

Giving an ebook?

CTA:

Download Now

Selling shoes?

CTA:

Shop Now

Offering a
consultation?

CTA:

Book a Consultation

Key Takeaway

A good CTA is clear, relevant, and matches your goal.

*Guide
your customer
to take action.*

5 AI-Generated Ad Variations

“Modern Facilities and Trainer Support”

Everything you need to reach your fitness goals.

Start Your Trial

When Reviewing AI Output, Ask:

Is it specific?

Does it clearly say what is being offered?

Is the benefit clear?

Can the customer quickly understand the value?

Is it believable?

Does it sound realistic and trustworthy?

Does it match the target customer?

Is it relevant to their needs and interests?

Key Takeaway

Review and refine AI suggestions. Choose the variations that are **clear, specific, and relevant**.

Be specific.
Be relevant.
Get better results.

What Is A/B Testing?

Show different versions to comparable audiences and measure their performance.

Let the
data decide.

Impressions

10,000

Click-Through Rate

6.8%

Orders

210

How It Works

1. Create variations

Make two (or more) versions with different headlines, ad copy or CTA.

2. Show to similar audiences

Display each version to comparable audience groups.

3. Measure performance

Track results like clicks, sign-ups or sales.

4. Find the winner

Let the data decide, not personal preference.

Key Takeaway

A/B testing removes guesswork. The **actual audience** provides the evidence.

Test.
Learn.
Grow.

What Should You Measure?

The right metric depends on your campaign objective.

Different goals. Different metrics.

Campaign Objective	Relevant Metric(s)	What It Tells You
 Awareness Get your brand in front of more people.	Reach / Impressions	How many people saw your ad.
 Website Traffic Drive people to your website.	Click-through rate (CTR)	How many people clicked your ad.
 Purchases Increase product sales.	Conversion rate / Purchases	How many people completed a purchase.
 Lead Generation Collect potential customer information.	Cost per lead / Lead conversion	How many qualified leads you get and how many convert.

Key Point

Don't ask:

“Which ad got the most clicks?”

Ask:

“What business outcome was the campaign designed to achieve?”

Measure what matters.

Key Takeaway

Choose metrics that match your **campaign objective** and measure the **right outcome**.

*Right metric.
Better decisions.
Better results.*

Clicks Aren't Always Success

A higher click-through rate doesn't always mean higher business value.

Ad A

Offer-focused

**Get 20% Off
Your First Order**

Delicious meals,
delivered to your doorstep.

Order Now

Impressions

10,000

Clicks

500

Purchases

10

Ad B

Benefit-focused

**Your Favourite
Meal, Delivered
Faster**

Good food. Less waiting.

Explore Menu

Impressions

10,000

Clicks

300

Purchases

30

Key Takeaways

**Ad A generated
more clicks.**

500 clicks vs 300 clicks

**Ad B generated
more purchases.**

30 purchases vs 10 purchases

**The right metric depends
on your objective.**

A high CTR does not
automatically mean more
business value.

Key Message

Measure what matters. Match your metric to your **campaign objective.**

More clicks
≠
More value.

Conversion Rate

The percentage of visitors who take the desired action.

*From clicks
to customers.*

Same traffic.
Different results.

Ad A

Higher conversion rate

Clicks

1,000

Purchases

100

Conversion Rate = $100 \div 1,000 \times 100$

= 10%

Ad B

Lower conversion rate

Clicks

1,000

Purchases

50

Conversion Rate = $50 \div 1,000 \times 100$

= 5%

Key Takeaways

Conversion rate shows
how many visitors take action.

An ad may get clicks,
but fewer people may convert.

Use conversion rate (and other
relevant metrics) to find the
better variation.

Key Message

More clicks don't always mean more business. **Focus on conversions.**

*Right metric.
Better decisions.*

Don't Change Five Things at Once

If you change multiple elements, you won't know what made the difference.

Test
one thing
at a time.

Not Recommended

Changing multiple elements.

Ad A

- Headline A
- Image A
- Copy A
- CTA A

Ad B

- Headline B
- Image B
- Copy B
- CTA B

Ad B performs better. But why?
You don't know!

Recommended

Change one variable at a time.

Ad A

- Headline A
- Same image
- Same copy
- Same CTA

Ad B

- Headline B
- Same image
- Same copy
- Same CTA

**Now you're primarily testing
the headline.**

Key Takeaways

Test one element at a time

Isolate the variable you want to evaluate.

Keep other elements the same

Use the same image, copy, and CTA when testing a headline (and vice versa).

Find out what works

It helps you understand what actually drives better performance.

Make better decisions

Use clear results to improve your ads step by step.

Key Message

Test one change at a time. Clear tests lead to **clear insights.**

Small changes.
Big insights.

AI Prompt for A/B Testing

Use this prompt to compare two advertising variations and get an objective analysis.

Better prompts.
Better insights.

The Prompt

I want to test two advertising variations.

Compare them based on:

- Target audience relevance
- Clarity of value proposition
- Strength of headline
- CTA clarity
- Likely customer intent

Do not declare a winner based on your opinion.

Explain what real-world metric should be used to evaluate the two versions based on the campaign objective.

Campaign objective: [Objective]

Version A: [Ad]

Version B: [Ad]

Example Ads

Version A

Discount-focused

Get 20% Off Your First Order

Premium sports shoes
for a better you.

Shop Now

Version B

Benefit-focused

Run Further Feel Stronger

Comfortable. Durable.
Made for your journey.

Explore Collection

Campaign Objective
(Example)

Purchases

Evaluation Criteria

Target audience relevance

Does the ad speak to the right people?

Clarity of value proposition

Is the benefit clear and easy to understand?

Strength of headline

Does it grab attention and communicate the offer?

CTA clarity

Is the next step clear?

Likely customer intent

What type of user is this likely to attract?

Key Takeaways

AI can evaluate the copy.

It can compare strengths and weaknesses.

Use real-world data to decide.

Actual performance requires testing with your audience.

Choose the right metric for your objective.

e.g. clicks, conversions, purchases, or leads.

Test, measure, learn.

Let data guide your decisions, not assumptions.

Key Message

AI gives insights. Real-world data gives results.

Test smarter.
Grow faster.

Criteria	Version 1	Version 2	Version 3	Version 4	Version 5
Clarity	4	5	4	3	4
Relevance	4	5	4	4	4
Specificity	3	4	4	3	4
CTA	4	5	4	4	4
Truthfulness	5	5	4	4	5

Next Steps

Choose one to test first based on your hypothesis.

Use the right metric for your campaign objective.

Let the audience provide the evidence.

Key Message

Your choice is a hypothesis. The audience provides the evidence.

Test.
Learn.
Improve.

Common Mistakes to Avoid

Learn from these mistakes to run better A/B tests.

Test smarter.
Get better results.

1 Choosing the winner by personal preference

You are not the customer.
What you like may not be what your audience prefers.

2 Measuring the wrong metric

More clicks may not mean more sales.
Choose a metric that matches your campaign objective.

3 Testing too many changes

If you change multiple elements at once, you may not know what caused the difference.

- ✓ Headline
- ✓ Image
- ✓ Copy
- ✓ CTA

4 Using exaggerated claims

AI can make advertisements sound convincing without making the ad claims true.

Be honest and ensure you can support what you say.

5 Making every CTA "Buy Now"

The CTA should match the customer's stage and desired action.

Use relevant CTAs like "Learn More", "Explore", "Sign Up", or "Get a Quote".

6 Creating different wording but the same idea

Five variations should provide meaningful alternatives, not five synonyms.

Key Message

Avoid these mistakes to run A/B tests that give **real insights**.

Better testing.
Better business.

Your Turn to Analyse

Which ad performs better for the goal: **Increase completed purchases?**

Business: Online clothing store
Objective: Increase completed purchases

A**Ad A**

Higher CTR, fewer purchases

**TREND
DIFFERENT
THIS SEASON**

Stylish outfits for
every mood.

Shop Now

Impressions	Clicks	CTR	Purchases
50,000	3,000	6.0%	60

B**Ad B**

Lower CTR, more purchases

**Everyday
Style,
Made for You**

Comfortable. Versatile.
Always in style.

Shop Collection

Impressions	Clicks	CTR	Purchases
50,000	1,500	3.0%	150

What Should You Investigate?

Conversion rate

What percentage of clicks resulted in purchases?

Cost per purchase

Which ad delivers a lower cost per purchase?

Number of purchases

Which ad generated more completed purchases?

Audience quality

Are the clicks coming from the right audience?

Landing-page experience

Does the landing page support the ad and make it easy to purchase?

Sample size

Is the data large enough to be reliable?

Fair test

Were the ads tested under the same conditions (budget, audience, time, placement)?

Key Message

A/B testing is not about which ad looks better, but **which one achieves the business outcome.**

*Test. Analyse.
Make informed decisions.*
