

PROMPT ENGINEERING FUNDAMENTALS

CLARITY

CONTEXT

CREATIVITY

PRECISION

What is a Prompt?

A prompt is the instruction, question, or command that you give to an AI model.

Simply put:

Prompt = Your instructions to AI

Just like giving instructions to a new employee, the clearer your instructions, the better the result.

Everyday Example

Unclear Instruction

“Make tea.”

They may ask:

- Black tea?
- Milk tea?
- Sugar?
- For how many people?

VS

Clear Instruction

“Please make two cups of milk tea with one teaspoon of sugar each.”

The result is much clearer and better.

AI works the same way.

Clearer Prompt → Better Result

What is Prompt Engineering?

Prompt Engineering is the **process of designing prompts** that help AI generate **accurate, useful, and high-quality** responses.

It is about communicating effectively with AI.

A well-designed prompt helps AI understand your intent clearly and provide better results.

Better Prompts = Better Results

The quality of the output depends on the quality of the prompt.

A Valuable Skill

Prompt engineering saves time, improves productivity, and helps you get the most out of AI.

Think of it as
**learning how to ask
better questions.**

Good prompts lead to accurate, relevant, and high-quality AI responses.
Prompt Engineering helps you unlock the true potential of AI.

Why is Prompt Engineering Important?

The **quality of your prompt** determines the quality of the AI's response.

✗ A weak prompt often produces:

- Generic answers
- Missing information
- Wrong format
- Irrelevant content

✓ A well-crafted prompt produces:

- Accurate responses
- Better structure
- Higher quality
- Less editing

Example

Poor Prompt

"Write an email."

Possible Output:

A short generic email with little context.

Better Prompt

"Write a **professional apology email** to a customer whose order has been **delayed by three days**. Keep the tone **polite, apologize sincerely, explain the delay** briefly, and offer a **10% discount**. Limit the email to **150 words**."

The AI now knows:

Role

Situation

Audience

Tone

Length

Expected Outcome

Better prompts = Better results.

Clear prompts save time, improve accuracy, and help you get the most out of AI.

Prompt Engineering Process

Prompt engineering is iterative.

You rarely get the perfect answer on the first try.

1

Problem

2

Write Prompt

3

AI Generates Response

4

Review Output

5

Improve Prompt

6

Better Output

Anatomy of a Good Prompt

A strong prompt usually contains **five key parts**:

A well-structured prompt helps AI understand your needs clearly and deliver better results.

Let's understand each one.

1

Role

Define the role or perspective the AI should adopt.

2

Context

Provide background information to set the right context.

3

Task

Clearly state what you want the AI to do.

4

Constraints

Specify any limits, rules, or requirements.

5

Output Format

Define how the response should be structured.

PART 1

Role

Tell AI who it should act as.

This sets the perspective for the response.

Examples

Marketing
Manager

HR
Recruiter

Software
Engineer

Financial
Analyst

Teacher

Business
Consultant

Example

“You are an experienced HR Manager.”

This sets the perspective for the response.

PART 2

Context

Provide background information.

Context helps AI understand the situation.

Example

Our company sells **laptops online**.

Instead of

Write an email.

This prompt has no context.
AI will not understand the situation clearly.

Use

Our customer received a damaged laptop.

This prompt provides context.
AI understands the situation and gives a better response.

Key Takeaway

The more relevant background you provide, the more accurate and useful the AI response.

PART 3

Task

Tell AI exactly what you want.

Clear tasks lead to
clear and useful responses.

Examples

Write

Summarize

Explain

Compare

Generate

Translate

Analyze

Example

Write a professional apology email.

This task is specific and clear.

AI understands exactly what you want and delivers a focused response.

Key Takeaway

The more specific your task, the more accurate and relevant the AI response.

Constraints

Tell AI what limitations to follow.

Constraints help AI stay focused and meet your expectations.

Examples

Maximum
200 words

Formal
tone

Bullet points
only

Simple
English

Include three
examples

Do not use
technical
jargon

Example

“Keep it under 150 words.”

This constraint sets a clear limitation.
AI will generate a concise and
well-focused response.

Key Takeaway

Clear constraints = better, more useful AI responses.

PART 5

Output Format

Tell AI how to present the answer.

A clear format makes the response **easy to read and use.**

Examples

Table

Bullet points

Numbered list

Email

JSON

Markdown

Presentation outline

Example

“Present the answer as a table.”

This instruction tells AI exactly how you want the output to look.

Feature	Description
Speed	Provides fast results
Accuracy	High accuracy in answers
Ease of Use	Simple and user-friendly

Key Takeaway

The right output format saves time and makes the response more useful.

COMPLETE PROMPT STRUCTURE

A good prompt has five key parts that work together.

1. ROLE

You are a marketing manager.

2. CONTEXT

Our company is launching a new smartwatch.

3. TASK

Write a promotional email.

4. CONSTRAINTS

- Maximum 200 words.
- Friendly tone.

5. FORMAT

Professional business email.

COMPLETE PROMPT (PUT TOGETHER)

Role: You are a marketing manager.

Context: Our company is launching a new smartwatch.

Task: Write a promotional email.

Constraints: Maximum 200 words. Friendly tone.

Format: Professional business email.

EXAMPLE OUTPUT (AI RESPONSE)

Subject: Introducing Our All-New Smartwatch – Built for Your Lifestyle

Dear Valued Customer,

We're excited to announce the launch of our all-new smartwatch, designed to keep up with your every move and elevate your everyday.

Packed with powerful features like health tracking, smart notifications, long battery life, and a sleek modern design, this smartwatch is your perfect companion for work, workouts, and everything in between.

For a limited time, enjoy exclusive launch offers and be among the first to experience the future on your wrist!

Explore now and make every moment smarter.

Best regards,
The Marketing Team
[Company Name]

VAGUE PROMPT vs SPECIFIC PROMPT

The more specific your prompt, the better the AI response.

EXAMPLE 1

VAGUE

“Write about AI.”

PROBLEMS:

- ✗ Too broad
- ✗ No audience
- ✗ No length
- ✗ No purpose

The output will likely be generic, too long, or unfocused.

VS

BETTER

“

You are an AI trainer.
Explain Artificial Intelligence to **MBA students** using **simple English**.
Include **five real-world business examples**.
Limit the answer to **500 words**.
Use **headings** and **bullet points**.

WHY THIS IS BETTER:

- ✓ Clear role (AI trainer)
- ✓ Specific audience (MBA students)
- ✓ Clear content focus (explain AI)
- ✓ Specific examples (five real-world business examples)
- ✓ Length limit (500 words) and format (headings + bullets)

The AI gets clear direction and can produce a focused, relevant, high-quality response.

VAGUE PROMPT VS SPECIFIC PROMPT

EXAMPLE 2

❌ VAGUE PROMPT

Make a presentation.

⚠️ PROBLEMS:

- ❌ No topic specified
- ❌ No audience mentioned
- ❌ No number of slides
- ❌ No content structure
- ❌ No guidance on what to include

✅ BETTER PROMPT

Create a 10-slide PowerPoint outline on **Digital Marketing** for MBA students.

Include:

- Objectives
- Examples
- Summary
- Discussion Questions

★ BENEFITS:

- ✓ Clear topic and audience
- ✓ Specific number of slides
- ✓ Defined structure and key elements
- ✓ Includes content expectations
- ✓ Produces a focused and useful presentation outline

10-SLIDE OUTLINE PREVIEW

1	2	3	4	5	6	7	8	9	10
Title Slide Introduction	Objectives of Digital Marketing	What is Digital Marketing?	Importance in Today's World	Key Components of Digital Marketing	Digital Marketing Channels	Real-World Examples	Benefits for Businesses	Summary	Discussion Questions

TAKEAWAY: Specific prompts give the AI clear direction, resulting in structured, relevant, and high-quality outputs.

VAGUE PROMPT VS SPECIFIC PROMPT

EXAMPLE 3

✗ VAGUE PROMPT

Write code.

⚠ PROBLEMS:

- ✗ No programming language specified
- ✗ No specific task or objective
- ✗ No input or output details
- ✗ No context or requirements
- ✗ No instructions on explanation or format

✓ BETTER PROMPT

You are a senior Python developer.
Write a Python program to read a CSV file and calculate the **average sales by month**.
Explain every step with **comments**.

★ BENEFITS:

- ✓ Clear role and expertise
- ✓ Specific programming language (Python)
- ✓ Well-defined task
- ✓ Clear input (CSV file) and output (average sales by month)
- ✓ Request for explanation with comments
- ✓ Produces accurate, relevant, and easy-to-understand code

```
1 import csv
2 from collections import defaultdict
3
4 # Dictionary to store total sales and count of months
5 sales_data = defaultdict(lambda: {'total': 0, 'count': 0})
6
7 # Open and read the CSV file
8 with open('sales.csv', mode='r', newline='', encoding='utf-8') as file:
9     reader = csv.DictReader(file)
10
11     # Iterate through each row in the CSV file
12     for row in reader:
13         month = row['Month']           # Get the month
14         sales = float(row['Sales'])    # Get the sales amount as float
15         sales_data[month]['total'] += sales # Add sales to total
16         sales_data[month]['count'] += 1   # Increment count
17
18 # Calculate average sales by month
19 average_sales = {month: data['total'] / data['count']
20                  for month, data in sales_data.items()}
21
22 # Print the average sales by month
23 for month, avg in sorted(average_sales.items()):
24     print(f"{month}: {avg:.2f}")
```

TAKEAWAY: The more specific and detailed your prompt, the better and more accurate the code you'll receive.

COMMON PROMPTING MISTAKES

1

BEING TOO SHORT

Short prompts give vague results.

✗ Too Short

Explain AI.

✓ Better Prompt

Explain Artificial Intelligence to first-year MBA students using simple language and real business examples.

2

MISSING CONTEXT

AI doesn't know the important details.

✗ Missing Context

Write an email.

- Who?
- Tone?
- Why?
- Audience?

✓ Better Prompt

Write a professional apology email to our customer who received a damaged product.
Tone: sincere and empathetic.
Audience: existing customer.

3

TOO MANY REQUESTS

Mixing many tasks reduces quality and confuses the AI.

✗ Too Many Requests

Write an email, create a presentation, summarize a report, generate an image, and write Python code.

✓ Better Approach

Break it into separate prompts:

- Write the email
- Create the presentation
- Summarize the report
- Generate the image
- Write the Python code

4

NO OUTPUT FORMAT

AI chooses its own format, which may not be what you want.

✗ No Output Format

Explain machine learning.

✓ Better Prompt

Explain machine learning in a comparison table.

5

UNREALISTIC EXPECTATIONS

AI can't predict the future with certainty.

✗ Unrealistic Prompt

Predict next year's stock market exactly.

✓ Better Approach

Analyze current market trends and factors that may influence next year's stock market.

KEY TAKEAWAY: Be clear, specific, and realistic. Provide context, define the task, set constraints, and specify the output format for the best results.

PROMPT TEMPLATES

EMAIL TEMPLATE

You are a customer support manager.

Write a professional email to a customer regarding:

Context:

Tone:

Word Limit:

Format:

Business Email

Tip: Replace the blanks with your details to get better, more accurate results.

EXAMPLE OUTPUT

Context: Refund delay for an online order

Tone: Apologetic and helpful

Word Limit: 150 words

Format: Business Email

Subject: Update Regarding Your Refund

Dear Mr. Sharma,

Thank you for reaching out to us. We sincerely apologize for the delay in processing your refund for Order #12345.

Due to a technical issue, there was an unexpected delay in our refund system. Please be assured that your refund has been processed today, and the amount will reflect in your account within 3–5 business days.

We truly value your patience and understanding. If you have any further questions or concerns, please don't hesitate to contact us.

Warm regards,

Neha Verma

Customer Support Manager
ABC Solutions Pvt. Ltd.

Why use templates?

Saves time

Improves clarity

Delivers better results

PROMPT TEMPLATES

REPORT TEMPLATE

You are a business analyst.

Prepare a report on:

Topic:

Include:

- Introduction
- Findings
- Recommendations
- Conclusion

Maximum:

1000 words

Tip: Provide the topic clearly for best and relevant results.

EXAMPLE OUTPUT

Topic: The Impact of Remote Work on Employee Productivity

1. INTRODUCTION

Remote work has become a significant part of modern work culture. This report examines its impact on employee productivity, based on recent studies, surveys, and organizational data.

2. FINDINGS

- 72% of employees reported increased productivity while working remotely.
- Flexible work hours and reduced commute time are key productivity drivers.
- Challenges include isolation, communication gaps, and work-life balance.
- Productivity varies by role, industry, and access to technology.

3. RECOMMENDATIONS

- Organizations should adopt hybrid work models.
- Invest in collaboration tools and digital infrastructure.
- Encourage regular check-ins and performance feedback.
- Provide resources for employees' well-being and workspace setup.

4. CONCLUSION

Remote work can enhance productivity when managed effectively. By addressing challenges and following best practices, organizations can build a more productive, engaged, and future-ready workforce.

Why use templates?

Saves time

Ensures structure

Delivers clear and actionable results

PROMPT TEMPLATES

Use these ready-to-use templates to get better and more targeted results from AI.

MARKETING TEMPLATE

You are a digital marketing expert.

Create a social media campaign for:

Product:

Audience:

Platform:

Include:

- Headlines
- Captions
- CTA

Tip: Fill in the details clearly for more relevant and high-quality results.

EXAMPLE OUTPUT

Product: SmartFit Watch

Audience: Fitness Enthusiasts (18-35 years)

Platform: Instagram

	HEADLINES	CAPTIONS	CTA
 Post 1 (Product Launch)	Track More. Achieve More. SmartFit Watch.	Introducing SmartFit Watch – your ultimate fitness partner. Track your workouts, monitor your health, and stay ahead of your goals.  Post 2 (Feature Highlight)	Every Step Counts. Every Beat Matters.	From heart rate monitoring to sleep tracking – SmartFit Watch gives you real-time insights to live a healthier life. All on your wrist. 🕒 ⭐ #HealthMatters #SmartFitWatch	Learn More About Features! Learn More →
 Post 3 (Social Proof)	Trusted by Thousands. Loved by You.	Join 25,000+ fitness lovers who trust SmartFit Watch to crush their goals every day. Are you next? 🔥 #JoinTheMovement #SmartFitWatch	Join the Smart Fitness Community! Join Now →
 Post 4 (Offer/Promotion)	Limited Time Offer! Don't Miss Out.	Special launch offer! Get 10% OFF on SmartFit Watch. Limited stock available. Hurry! ⏰ #LimitedOffer #SmartFitWatch	Grab Your Offer Before It's Gone! Buy Now →

Why use templates?

Saves time

Ensures clarity & consistency

Delivers better results

ACTIVITY: REWRITE THESE VAGUE PROMPTS

Convert vague prompts into clear, specific, and effective prompts.

PROMPT 1

VAGUE PROMPT

Write an email.

IMPROVED VERSION (EXAMPLE)

You are a customer service executive.

Write a professional apology email to a customer whose order was delayed by three days.

Use a polite tone, explain the reason briefly, and offer a 10% discount.

Limit the email to 150 words.

PROMPT 2

VAGUE PROMPT

Explain AI.

IMPROVED VERSION (EXAMPLE)

You are an AI trainer.

Explain Artificial Intelligence to MBA students in simple language.

Include the following:

- Definition of AI
- Key types of AI
- How AI works (in brief)
- 5 real-world business examples
- Benefits and limitations of AI

Keep the explanation clear, engaging, and easy to understand.

Limit the answer to 500 words.

PROMPT 3

VAGUE PROMPT

Create a presentation.

IMPROVED VERSION (EXAMPLE)

You are a presentation expert.

Create a 10-slide PowerPoint presentation for a sales team on "How Our Product Increases Sales".

Include the following:

- Slide title and key points for each slide
- Engaging headlines
- Data or examples where relevant
- A strong conclusion slide with a call to action

The presentation should be persuasive, professional, and easy to follow.

Use concise content suitable for a 15-minute presentation.

TIP: Be specific about the role, audience, purpose, tone, length, and format to get the best results from AI.

Role

Audience

Purpose

Tone

Length

Format
