

# AI for Business Communication

Communicate **smarter**. Connect **better**.  
Create **impact** with the power of AI.

- |                                                                                     |                                                                                     |                                                                                     |                                                                                       |                                                                                       |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|  |  |  |  |  |
| <b>SMARTER WRITING</b>                                                              | <b>MULTILINGUAL SUPPORT</b>                                                         | <b>EMAIL &amp; RESPONSE MADE EASY</b>                                               | <b>MEETINGS &amp; SUMMARIES</b>                                                       | <b>BETTER COLLABORATION</b>                                                           |
| Clear, concise and context-aware messages                                           | Break language barriers and reach global audiences                                  | Draft, refine and reply professionally in seconds                                   | Transcribe, summarize and capture key action items                                    | Share ideas, feedback and updates more effectively                                    |

# 1. Why Business Email Writing Matters

Email is one of the most common forms of communication in organizations.

## Employees use emails to:

- |                                                                                                              |                                                                                                                    |
|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
|  Communicate with managers  |  Report problems                |
|  Talk to customers          |  Schedule meetings              |
|  Coordinate with colleagues |  Follow up on tasks             |
|  Request information      |  Send proposals and documents |

### A poorly written email can create:

Confusion

Misunderstanding

Unprofessional  
impressions

Delays

Conflict

AI can help us write emails faster, **but human judgment is still needed.**

## 2. Structure of a Professional Email

A typical business email contains:

A clear structure makes your email easy to read, understand, and act upon.

# 3.

# Example of a Professional Email

|                                                                                     |              |                                                                                                                               |
|-------------------------------------------------------------------------------------|--------------|-------------------------------------------------------------------------------------------------------------------------------|
|    | Subject      | Project Status Update – Website Development                                                                                   |
|    | Greeting     | Dear Mr. Sharma,                                                                                                              |
|    | Opening      | I am writing to provide an update on the current status of the website development project.                                   |
|   | Main Message | The development of the homepage and authentication module has been completed. The team is currently working on the dashboard. |
|  | Action       | We expect to complete the remaining modules by Friday.                                                                        |
|  | Closing      | Please let me know if you have any questions or require any additional information.                                           |
|  | Signature    | Best regards,<br>Aman                                                                                                         |

**Well-structured emails** communicate clearly, save time, and build professionalism.

# 3. Important Elements of a Good Business Email

## 1. Clear Subject

The subject should immediately tell the reader what the email is about.

**Poor Example**

***"Important"***

**Good Example**

***"Request for Approval – Marketing Campaign"***

## 2. Professional Greeting

Choose the greeting based on your relationship with the recipient.

**Formal**

***"Dear Mr. Sharma,"***

**Neutral**

***"Hello Rahul,"***

**Professional but Friendly**

***"Hi Rahul,"***

A good subject and appropriate greeting create a positive first impression and encourage the recipient to read your email.

## 4. Get to the Point

 Business professionals are often busy.

 **Avoid unnecessary introductions.**

### Weak

“  
*I hope you're doing well.  
I just wanted to reach out  
because I was thinking that  
perhaps we could discuss...*”

### Better

“  
*I am writing to request your  
approval for the proposed  
marketing campaign.*”

**Key Takeaway:** Be clear, concise, and direct. Respect the reader's time.

## 5. Clear Call to Action

The reader should understand **what you want them to do.**

### Examples:

**“Please review the attached proposal and share your feedback by Friday.”**

**“Kindly approve the document so that we can proceed with implementation.”**

**“Please confirm your availability for the meeting.”**

## 6. Using AI to Write Emails

AI can be a powerful assistant, but the quality of the output depends on the quality of your prompt.

 **Instead of saying:**

***“Write an email.”***

 **Better Prompt**

You are a professional business communication specialist.

Write an email to my manager requesting approval for a two-day training program.

**Context:**

The training is scheduled for next week and requires a budget of ₹15,000.

**Tone:** Professional and respectful.

Keep it under **150 words**.

Include a **clear request for approval**.

**Key Takeaway:** Provide clear context, purpose, tone, and constraints to get a relevant and useful email draft from AI.

# 7. Tone Adjustment

One of the most useful capabilities of Generative AI is tone adjustment. The same message can be communicated in different ways depending on the audience.

For example:

*“The report is late.”*

This can be rewritten as:

**Formal**

*The report has not yet been submitted and is currently pending completion.*

**Friendly**

*Just a quick update—the report is still being finalized.*

**Urgent**

*The report is overdue and needs to be submitted as soon as possible.*

**Key Takeaway:** The information remains the same, but the communication style changes.

## 8. Common Business Email Tones

### Formal

#### Used for:

- Senior management
- Important clients
- Official communication
- External organizations

#### Example:

*Dear Sir/Madam,  
I am writing to formally request...*

### Professional

#### Used for:

- Managers
- Colleagues
- Business partners

#### Example:

*Hello Rahul,  
Please find the requested report attached.*

### Friendly

#### Used for:

- Familiar colleagues
- Internal teams
- Informal professional communication

#### Example:

*Hi Rahul,  
Just sharing the updated report  
for your review.*

### Urgent

#### Used for:

When immediate action is required.

#### Example:

*Please review the attached document  
and provide your approval by 3 PM today  
so that we can proceed.*

# 9. Same Message, Different Tones

**Situation:** A customer has not paid an invoice.

**Formal**

*Dear Customer,*

*This is a reminder that invoice #1025 remains outstanding. We kindly request that the pending amount be settled at your earliest convenience.*

**Friendly**

*Hi Rahul,*

*Just a quick reminder that invoice #1025 is still pending. Please let us know if you need any information from our side.*

**Urgent**

*Dear Customer,*

*Invoice #1025 remains unpaid. Please arrange payment by the due date to avoid any disruption to your account.*

**Key Takeaway:** The core message is the same, but the tone changes based on the relationship and the level of urgency.

# 10. Tone-Shifting Prompt

You can ask AI to rewrite the same email in different tones to match your audience and purpose.

## The Prompt

Rewrite this email in three different tones:

- 1 Formal
- 2 Friendly
- 3 Urgent

Keep the meaning unchanged.

Email:

[ Paste email here ]

This is called **tone control**.

## 1. Formal

Dear Customer,

This is a reminder that invoice #1025 remains outstanding. We kindly request that the pending amount be settled at your earliest convenience.

Sincerely,  
Your Company Name

## 2. Friendly

Hi Rahul,

Just a quick reminder that invoice #1025 is still pending. Please let us know if you need any information from our side.

Thanks,  
Your Company Name

## 3. Urgent

Dear Customer,

Invoice #1025 remains unpaid. Please arrange payment by the due date to avoid any disruption to your account.

Regards,  
Your Company Name

**Key Takeaway:** The message is the same, but the tone changes to fit the audience and urgency.

# 11. Making AI Emails Sound Human

## A common problem with AI-generated emails

is that they can sound:

- Too generic
- Too formal
- Repetitive
- Robotic
- Overly polite

## For example:

*"I hope this email finds you in the best of health and spirits."*

## A more natural version:

*"I am writing regarding the project update."*

## How to Make AI Writing More Natural

Use simple language.

Remove unnecessary formal phrases.

Avoid repetitive expressions.

Keep sentences concise.

Match the organization's communication style.

Use a natural professional tone.

## Prompt

“

*Rewrite this email so it sounds natural and professional.*

*Avoid overly formal phrases and unnecessary corporate jargon.*

*Keep the message concise and clear.*

”

# 12. AI Email Workflow

A structured workflow helps you create effective, accurate, and professional emails with AI.

## Important Reminder

**Never blindly send the first AI-generated email.**

Always review and refine before sending.

## Best Practices

- ✓ Be specific in your prompts.
- ✓ Provide all necessary context.
- ✓ Keep emails concise and to the point.
- ✓ Match the tone with your audience and purpose.
- ✓ Double-check facts and attachments.
- ✓ Proofread for grammar and spelling.
- ✓ Follow your organization's communication style.

# Business Email Prompts

Use these prompts to generate professional and effective business emails with AI.

## 1 Meeting Request

- **Prompt:** Write a professional email requesting a meeting with the [team/dept].
- **Purpose:** Discuss [specific topic or issue].
- **Duration:** [duration] minutes.
- **Tone:** [e.g., professional, concise, friendly].
- **Additional:** Ask the team to suggest a suitable time.

## 2 Apology Email

- **Prompt:** Write a professional apology email to a customer whose order was delayed by [X] days.
- **Include:** Acknowledge the inconvenience, apologize sincerely, mention that the order is now being processed, and offer [discount/compensation].
- **Tone:** Sincere and professional.
- **Length:** Keep it under [word limit, e.g., 150 words].

## 3 Follow-Up Email

- **Prompt:** Write a concise follow-up email to a client who has not responded to our proposal.
- **Include:** Mention that we would be happy to answer any questions. Ask whether they have had an opportunity to review the proposal.
- **Tone:** Polite and professional.
- **Length:** Keep it concise.

**Tip:** Provide clear context (purpose, audience, tone, key points) to get the best AI-generated email.

14.

# Activity – One Email, Three Tones

Use AI to write the same email in different tones and compare the results.

## SITUATION

You need to inform an employee that their report is overdue.

### STEP 1

Ask AI

**Prompt:**

Write a professional email informing an employee that their weekly report is overdue. Ask them to submit it by 5 PM today.

### STEP 2

Rewrite as: Formal

**Prompt:**

Rewrite this email in a formal tone.

### STEP 3

Rewrite as: Friendly

**Prompt:**

Rewrite this email in a friendly but professional tone.

### STEP 4

Rewrite as: Urgent

**Prompt:**

Rewrite this email in an urgent but respectful tone.

## Compare the Results

| Factor   | Formal                 | Friendly       | Urgent               |
|----------|------------------------|----------------|----------------------|
| Language | Formal                 | Conversational | Direct               |
| Tone     | Serious                | Warm           | Strong               |
| Length   | Medium                 | Short          | Short                |
| Best For | Official communication | Colleagues     | Time-sensitive tasks |

# 15. Discussion: AI Email Writing

Let's discuss some important questions about using AI for business emails.

## QUESTION 1

**Should AI-generated emails always be formal?**

**No.**

The tone should depend on:

- Recipient
- Situation
- Relationship
- Purpose

Use the right tone for the right situation.

## QUESTION 2

**Why can AI-written emails sound generic?**

Because AI doesn't automatically know:

- Your personality
- Your organization's communication style
- Your relationship with the recipient
- Your preferred wording

You need to provide context for better and personalized emails.

## QUESTION 3

**Who is responsible for the final email?**

**The person sending it.**

AI helped write it, but the sender is responsible for:

- Accuracy
- Tone
- Facts
- Confidentiality
- Final content

Always review, edit, and take ownership before you send.

## Key Takeaway

AI is a powerful assistant, but human judgment, context, and responsibility make the email effective and professional.

# Common Mistakes When Using AI for Emails

AI is a great assistant, but small mistakes can lead to big problems.

**1**  
MISTAKE

## Sending AI Output Without Reading It

AI may include incorrect names, dates, numbers, or promises.

### Example

AI might use the wrong name, wrong date, or make a promise you can't keep.

"We look forward to meeting you on **June 15th.**"

✘ Incorrect date

**2**  
MISTAKE

## Giving Too Little Context

✘ Too little context:

Write a customer email.

✔ Better:

Write an apology email to a customer whose delivery is delayed by three days.

**3**  
MISTAKE

## Overly Formal Language

AI can sometimes make a simple message unnecessarily complicated.

### Too formal:

"I hope this email finds you in the best of health and spirits. I am writing this email to bring to your kind attention..."

### Better:

"I am writing to inform you about the project update."

**4**  
MISTAKE

## Wrong Tone

An email to a close colleague doesn't need the same tone as an email to a CEO.

### To a colleague:

Hey John, can you send me the report when you get a chance? Thanks!

### To a CEO:

Dear Mr. Sharma, I would like to request the report at your earliest convenience. Thank you.

**5**  
MISTAKE

## Including Information You Didn't Verify

Always verify before you send.

Always verify:

Dates

Prices

Deadlines

Names

Attachments

Commitments

**Remember:** AI writes the draft. You make it accurate, appropriate, and trustworthy.

# Best Practices: Writing Business Emails with AI

Follow these steps to get better results and send effective emails!

## 1 Before Prompting

Ask yourself:

Who am I writing to?

Why am I writing?

What action do I want?

What tone should I use?

## 2 During Prompting

Include these details:

**Recipient** – Who is the email for?

**Context** – Background information that AI needs to know.

**Purpose** – Why are you writing?

**Tone** – Formal, friendly, urgent, etc.

**Length** – Short, medium, or detailed?

**Required action** – What should the recipient do?

## 3 After AI Generates the Email

Check the email carefully:

Is it accurate?

Is it clear?

Is the tone appropriate?

Does it sound like me?

Are there unnecessary sentences?

Did AI invent anything?

**Remember:** AI is your assistant, but you are responsible for the final email.

Good prompts + Careful review = Professional emails that build trust!

# ASSIGNMENT

## Write an AI Prompt

Create a prompt asking AI to write an email to your manager requesting leave for two days.

### Your prompt should include:

|                                                                                     |                      |                                                  |
|-------------------------------------------------------------------------------------|----------------------|--------------------------------------------------|
|    | <b>Role</b>          | Define who AI should act as.                     |
|   | <b>Context</b>       | Provide background information.                  |
|  | <b>Task</b>          | Clearly state what the AI should do.             |
|  | <b>Tone</b>          | Mention the tone you want.                       |
|  | <b>Length</b>        | Specify the desired length.                      |
|  | <b>Output format</b> | Mention the format in which you want the output. |

**Note:** Be clear, specific, and detailed in your prompt to get the best results.

# ASSIGNMENT

## Tone Transformation

Take the same email (requesting leave for two days) and ask AI to produce the following versions:

**1** Formal version

**2** Friendly version

**3** Urgent version

Compare how the wording changes.

### **1** Formal Version

#### Ask AI:

Write a formal email to my manager requesting leave for two days.

#### What to Notice:

- Polite and respectful language
- Complete sentences
- More formal expressions
- Emphasis on responsibility and work handover

### **2** Friendly Version

#### Ask AI:

Write a friendly email to my manager requesting leave for two days.

#### What to Notice:

- Warm and conversational tone
- Simple and natural language
- More personal and approachable
- Easy-going expressions

### **3** Urgent Version

#### Ask AI:

Write an urgent but respectful email to my manager requesting leave for two days.

#### What to Notice:

- Direct and to-the-point language
- Clear reason and duration
- Strong request with respect
- Emphasis on minimal disruption

**Goal:** Understand how tone changes the wording, style, and impact of the same message.

**Tip:** Observe the differences in greeting, sentence structure, word choice, and closing.

# ASSIGNMENT

## Real Business Scenario

**Scenario:** You are a manager. An employee has missed an important deadline.

**Task:** Write a prompt that asks AI to create a message that is **firm but respectful**.

### Your Prompt to AI

Write a prompt that includes:

**Role:** Define the AI's role.

**Context:** Provide the background and details.

**Task:** Clearly state what the AI should do.

**Tone:** Specify the tone – firm but respectful.

**Length:** Mention the preferred length.

**Output Format:** Specify the format of the message.

### AI Response (Review & Improve)

Review the AI response:

- Is the tone firm but respectful?
- Is the message clear and specific?
- Does it communicate the impact of the delay?
- Does it set clear expectations?
- Is there any unnecessary or too harsh wording?

Identify anything you would change:

- What lines would you soften or remove?
- What additional information would you add?
- How would you make the message more effective?

**Goal:** Use AI to communicate effectively in a real business situation while maintaining professionalism.

**Remember:** AI assists you, but you are responsible for the final message.
