Showcase Your Value & Achievements

CAREER FOCUSED

Tailored for Your Career Goals

LET'S START WITH A SITUATION

Imagine you are a **BBA student** looking for a **Marketing Internship**.

Marketing Intern

We are looking for a BBA student interested in **digital marketing**, **social media**, **market research** and **content creation**. The candidate should have **good communication skills** and basic knowledge of **Excel**.

200+
students
applying

RESUME 1

Priya Sharma

BBA Student

- Hardworking
- Good communication skills
- Quick learner
- Interested in business
- Basic computer knowledge

RESUME 2

Rohan Verma

BBA Student interested in Digital Marketing

Skills:

Social Media, Market Research, Excel, Content Creation, Communication

Project:

Conducted a consumer preference survey as part of a college marketing project.

Which student would you be more interested in interviewing?

The second resume isn't necessarily from a smarter student. The difference is that the **second student has communicated relevant information more clearly**.

And that's exactly what **we're learning today**.

PART 2 — WHAT IS ATS?

ATS — APPLICANT TRACKING SYSTEM

Don't worry about the technical definition.
Think of ATS as software that helps companies
manage large numbers of job applications.

IMAGINE:

The recruiter has limited time.
The ATS helps **organize** applications and
identifies resumes that appear relevant to
the job requirements.

So if the job description repeatedly
talks about:

Excel, Data Analysis, Power BI, Reporting

and your resume says only:

"Computer knowledge"

you're not communicating
your relevant skills
very clearly.

LET'S TEST YOU!

JOB DESCRIPTION

Business Analyst Intern

Candidate should have knowledge of
Excel, data analysis, Power BI,
business research and **communication.**

QUESTION:

What are the five important keywords
you would identify?

1

2

3

4

5

Take a moment and think.

Look for words that are directly connected to what the employer is looking for.

EXPECTED KEYWORDS

- ✓ Excel
- ✓ Data Analysis
- ✓ Power BI
- ✓ Business Research
- ✓ Communication

PART 3 — RESUME KEYWORDS

Now here's an important distinction.

KEYWORD OPTIMIZATION DOES NOT MEAN:

“Copy every word from the job description into your resume.”

That's keyword stuffing.

INSTEAD:

“Use **relevant keywords naturally** when they genuinely describe your abilities.”

EXAMPLES

Suppose you have **never used Power BI**.

Can you write:

Power BI Expert

just because the job description mentions it?
Obviously not.

→ That's not optimization. That's **misrepresentation**.

But suppose you're **currently learning Power BI**.

You could honestly write:

Power BI — Currently Learning

That's much better.

**GOLDEN
RULE**

NEVER USE AI TO TURN A SKILL GAP INTO A FAKE SKILL.

PART 4 – JOB DESCRIPTION ANALYSIS WITH AI

Now we're going to use AI for something **genuinely useful**.

Suppose you've found a job you really want.

Instead of immediately asking AI:
"Write my resume."

FIRST ask AI to **understand the job**.

Try this:

"Analyze the following job description."

Job description:

[Paste the job description]

Ask AI to identify:

1

Required technical skills

2

Required soft skills

3

Important keywords

4

Main responsibilities

5

Educational requirements

6

Skills that appear most important

Do not invent any information.

Why is this better than immediately asking AI to **write your resume**?

Because you **understand the job first**.
AI is helping you **analyze the opportunity** rather than simply doing the entire application for you.

PART 5 — COMPARE YOUR SKILLS WITH THE JOB

Now give AI *your own information*.

For example:

- I am a BBA student.
- I know Excel and Canva.
- I completed a consumer behavior project.
- I have participated in college events.
- I am currently learning digital marketing.
- I have no professional internship experience.

Then ask:

Compare my profile with this job description.

Create three categories:

- 1 Strong Match
- 2 Partial Match
- 3 Skills I need to develop

Do not claim that I have any skill or experience that I have not provided.

THIS IS EXTREMELY USEFUL. WHY?

1. STRONG MATCH

The skills and experiences you already have that match the job well.

2. PARTIAL MATCH

The skills or experiences you have, but not at the level or scale the job requires.

3. SKILLS I NEED TO DEVELOP

The skills or experiences you are missing and should work on to become a stronger candidate.

AI ISN'T JUST TELLING YOU: **"YOU'RE PERFECT FOR THIS JOB!"**
IT'S HELPING YOU IDENTIFY: **WHAT YOU ALREADY HAVE + WHAT YOU'RE MISSING.**

PART 6 — TURNING WEAK RESUME STATEMENTS INTO STRONGER ONES

WEAK STATEMENT

"Made a project on customer satisfaction."

It's true.
But it doesn't tell us much.

STRONGER STATEMENT (WITH AI HELP)

"Conducted a customer satisfaction survey and analyzed responses to identify factors influencing customer preferences."

AI didn't create a new achievement.
It simply helped communicate it more clearly.

WHEN FACTS CHANGE — IT'S MISREPRESENTATION

Student's Actual Achievement:

"Actually surveyed 50 people."

50

AI Writes (Incorrect):

"Conducted a survey involving 500 customers."

500

PROBLEM:

The language improved,
but the fact changed.
That's **misrepresentation**.

RULE:

IMPROVE THE WORDING. **NEVER** IMPROVE THE FACTS.

PART 7 — LINKEDIN HEADLINE

Your LinkedIn headline is one of the **first things a recruiter sees**.

WEAK HEADLINE

BBA Student

That's accurate.
But it tells them almost nothing else.

STRONGER HEADLINE

BBA Student | Interested in Digital Marketing |
Learning Business Analytics

Suddenly, the recruiter knows more about you.

SIMPLE FORMULA

Your LinkedIn headline can communicate:

+

+

Who you are

What interests
you

What you're
learning

EXAMPLE

BBA Student | Marketing & Business Analytics |
Exploring AI for Business

Notice something important.
We aren't saying "Marketing Expert" or "Business Analytics Specialist"
because you're still a student.

Your profile should communicate direction, not fake seniority.

WHAT NOT TO DO

Avoid titles that overstate your level:

"Marketing Expert"

"Business Analytics Specialist"

"Digital Marketing Guru"

PART 8 – LINKEDIN SUMMARY

Your **About section** is your chance to tell **your story**.

WEAK SUMMARY

Recruiter reads:

“I am hardworking, passionate, dedicated, motivated and ambitious.”

Sounds professional?
Maybe.

**But what does the recruiter actually learn about you?
Almost nothing.**

STRONG SUMMARY

Instead, your About section could say:

“I am a BBA student interested in marketing, consumer behavior and business analytics. Through academic projects and college activities, I have developed experience in market research, presentations and teamwork. I am currently exploring digital marketing and AI tools that can support business decision-making.”

Now the recruiter understands:

Who you are

What you're
interested in

What you've
done

What you're
learning

REMEMBER:

**SPECIFIC INFORMATION IS STRONGER THAN
IMPRESSIVE-SOUNDING ADJECTIVES.**

PART 9 – COVER LETTER

Imagine your resume gets shortlisted.
The company asks:

“Why are you interested in this internship?”

That’s where the **cover letter** comes in.

Think of it this way:

RESUME

Here is what
I have done.

VS

COVER LETTER

Here is why I am interested in
this opportunity and why my
background is relevant.

LET’S COMPARE

BAD AI-GENERATED STYLE

“I am extremely passionate about joining your prestigious organization and would be honored to contribute my valuable skills to your esteemed company.”

”

Sounds impressive.
But it also sounds like every other AI-generated application.

BETTER APPROACH

Give AI clear instructions and boundaries:

- ✓ Write a short cover letter for this internship.
- ✓ Use only the information I provide.
- ✓ Connect my genuine experience and skills with the job requirements.
- ✓ Keep the language natural and appropriate for a BBA student.
- ✓ Do not exaggerate my experience.
- ✓ Do not invent achievements.
- ✓ Keep it under 180 words.

Now AI has boundaries. And that’s important.

KEY TAKEAWAY

A cover letter is your chance to **connect your story with the opportunity** — honestly, clearly, and personally.

PART 10 – PERSONAL BRANDING

Three BBA students. Three interests. **Three different personal brands.**

STUDENT 1

Interested in:

Marketing + Social Media

STUDENT 2

Interested in:

**Finance + Excel +
Business Analytics**

STUDENT 3

Interested in:

**HR + Recruitment +
Employee Engagement**

Should all three have exactly the same LinkedIn profile?

Probably not.

Personal branding means gradually building a

clear professional identity.

YOUR LINKEDIN PROFILE CAN GRADUALLY COMMUNICATE YOUR INTEREST

Headline

Show what you
are interested in.

About Section

Share your focus,
goals and learning.

Projects

Highlight projects
that reflect your interest.

Certifications

Add relevant courses
and certifications.

Posts

Share content related
to your field of interest.

Skills

List skills that support
your career direction.

**IMPORTANT
REMEMBER:**

Personal branding is
NOT pretending to be an expert.

If you're learning digital marketing,
say:
"Learning digital marketing."

Don't say:
"Digital Marketing Expert."

MAIN ACTIVITY: AI-ASSISTED PROFESSIONAL PROFILE PACKAGE

You are going to create your own **AI-assisted Professional Profile Package**.

You Need Four Things:

1

RESUME

Improve the following sections:

- Professional summary
- Skills
- Projects
- Education
- Certifications
- Achievements

2

JOB MATCH

Choose one real internship/job description.

Use AI to identify:

- Important keywords
- Required skills
- Your matching skills
- Your skill gaps

3

LINKEDIN

Create the following:

- Professional headline
- About section

4

COVER LETTER

Create a customized cover letter for the selected job.

IMPORTANT REMINDERS:

- ✓ Use AI as a helper, not a replacer.
- ✓ Be honest about your skills and experience.
- ✓ Do not invent achievements or exaggerate your profile.
- ✓ Make sure your profile reflects your real abilities and learning journey.

BUT YOU HAVE 10 RULES

1

Never invent experience.

- No fake internships.
- No fake companies.
- No fake projects.

6

Keywords must be truthful.

Don't add Power BI just because the company mentioned it.

2

Never exaggerate your skills.

Basic Excel ≠ Advanced Excel Expert.

7

Don't let AI make you sound like a robot.

Your profile should still sound like you.

3

Never change numbers.

50 survey responses cannot become 500.

8

Don't hide every weakness.

A skill gap can become a learning goal.

4

Don't blindly copy AI output.

Read every sentence.
Ask yourself:
"Did I actually do this?"

9

Don't let AI create your professional identity.

AI can help you communicate it.

5

Don't use the same resume for every job.

Customize relevant sections.

10

You are responsible for everything you submit.

If AI writes it and you submit it, you own the information.

OPTIMIZATION vs. MISREPRESENTATION

AI can help you communicate better — but the **facts must remain true**.

SITUATION 1

You know basic Excel.
AI changes your resume to:

“Advanced Excel Specialist”

Is this okay? **No.**

Why? Because the wording has changed the **level** of your actual ability.

SITUATION 2

You completed a college marketing project.
AI writes:

“Conducted a market research project as part of an academic assignment.”

Is this okay? **Yes**, assuming that’s what you **actually** did.

SITUATION 3

You participated in organizing a college event.
AI writes:

“Led the organization’s annual business event.”

Did you actually lead it?

If not, this becomes **misrepresentation**.

SITUATION 4

You actually conducted a survey of 100 students.
AI writes:

“Conducted a survey of 100 students to analyze consumer preferences.”

Is this okay? **Yes.**

The AI improved the presentation without changing the **facts**.

KEY TAKEAWAY:

Optimization improves how you present the truth.
Misrepresentation **changes** the truth.

? FINAL QUESTION

If AI can make a student sound **more experienced, more skilled and more professional** than they actually are, where should the student draw the line?

THINK ABOUT:

What is truthful?

Does it accurately reflect what you have done or learned?

What is misleading?

Does the wording create an impression that is not completely true?

What if the recruiter asks you about it in an interview?

Could you confidently explain it?

Could you actually demonstrate the skill you claimed?

Do you have the practical ability to prove it?

Would you be comfortable explaining exactly how you achieved the result?

Can you walk through your process?

THE REAL TEST:

The line is where **truthful optimization** ends and **misrepresentation** begins. Be honest. Be prepared. **Be able to back up everything** you claim.

ONE FINAL TEST

Imagine you're a recruiter.

You have **30 seconds** to look at your own **LinkedIn profile**.

1

Who is this student?

Does their headline, photo, and About section clearly introduce them?

2

What are they interested in?

Is their focus or career interest easy to understand?

3

What skills do they have?

Are their key skills visible and relevant?

4

What have they actually done?

Do their projects, experience and achievements show real, practical work?

5

Why might I want to interview them?

What makes them stand out as a potential fit for the role?

THE GOAL:

If your profile answers these questions clearly, you're moving in the right direction.
